# Wire-frames

The JFrame is divided into 2 panels.

JPanel 1 is going to have the JTable and search functions.

JPanel2 is is where all the JTextFields the user will use to input new data to the JTable.

JFrame

| JPanel 1 | JPanel 2 |

The Add Patient Button will add the data to the JTable from the the TextFields.

The Combobox works on the JTable itself so that a patients condition can be updated and then saved.

The Save button will save the newly input Data from the Jtable to a .txt file.

Patient Information — □ X

Column name	Column name	Column name	Column name	Combobox▼
				Green
				Yellow
				Red
